

Company Aims and Commitments

Our aim is to deliver outstanding products and services that lead to the improved health of humanity and to this end we take pride in meeting our commitments to our stakeholders.

We believe that the success of our business depends fundamentally on meeting and exceeding the requirements and expectations of our customers and all those with whom we do business. We monitor our performance to make the best use of our resources and continually improve all activities that affect the quality of the products and services that we deliver to customers.

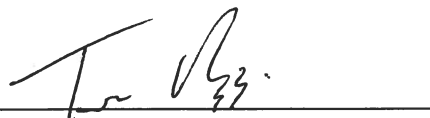

We ensure our staff is committed to comply with all applicable requirements in laws, regulations and standards where our products and services are offered. This Quality Policy is communicated and understood by all employees within the organization. It is posted in prominent places throughout the global facilities to maintain high standards within our organization.

Every Horizon Discovery employee is committed to this policy and empowered to meet quality objectives, maintain the effectiveness of the Quality Management System, and continually improve our processes for our customers.

The Quality Management System

The company uses a documented Quality Management System to define its business and technical operations. The Quality Policy, Quality Objectives and the effectiveness and integrity of the management system are regularly reviewed by Top Management and assessed by external authorities to ensure compliance. The Quality Management System scope and standards applied at Horizon Discovery are defined in the company's Quality System Manual.

Horizon Discovery's Chief Executive Officer has the authority and responsibility over this policy. Top Management and Management Representative will support the CEO and ensure the policy is communicated and continually reviewed for its suitability.

Terry Pizzie, Chief Executive Officer
